Students took part in various STEM activities in different rooms. They gained valuable experience in the Straw Plane Workshop, VR Zone, Programming Zone, and Drone Area.

Programming Zone

In the Programming Zone, students controlled different robots, had a football battle and finished different missions. They also acted as musicians and made songs through kinetic movement. Students could learn more about mechanics while they played mini games.

VR Zone

In the VR Zone, students have had the opportunity to experience AR (Augmented Reality) and VR (Virtual Reality) through different games. After wearing the VR goggles, students had to identify different animals from the VR video. In the AR games, students had to tackle different problems by choosing the correct AR card. In this zone, students also played a lot of interesting iPad games and learnt different vocabulary.

Drone Area

Students needed to learn simple coding in the Drone Area. They had to control the drone in order to finish different missions. In the missions, students also learned English instructions, such as 'go forward', 'turn left', 'turn right' and 'landing'.

Straw Plane Workshop

In the Straw Plane Workshop, the participants could make their own straw planes. After making their own planes, they tested them by trying to fly the planes in the testing zone. They have learnt about air resistance and explored how to fly their planes successfully.

The English and Stem Funfair was such a memorable experience! I had a fantastic time with my teachers and schoolmates. Let me share with you more about this unforgettable event. On the day, different stall games were set up, such as card games and paper airplane construction workshops. I helped teachers to teach students how to control a drone well using different instructions, however, some students did not understand how to master the drone. Therefore, I taught them patiently, step by step. Eventually, they were able to control the drone easily and I felt really satisfied and joyful. I am honoured to have been teachers' helpers. I hope I will have another opportunity to become a student ambassador in the school event next time.
